

ON-SITE DRUG TESTING

Health Network Laboratories can meet your needs for **COMPLETE** on-site drug testing procedures. Our comprehensive capabilities include:

- **On-Site Drug Test Kit with Integrated Adulterant Screen:**

Easy to use Monitect™, ToxCup™, or QuickTox™ test kits are FDA approved and provide the options for 5, 7, or 9-panel drug analysis with detection of common adulterants all in a single test unit.

- **Collection Kit & Chain-of-Custody Form:**

Simple collection procedures are provided for each kit type. The HNL *Chain-of-Custody* form conveniently provides both the report format for the on-site drug test and adulteration results, and the documentation for those occasions when GC/MS confirmation testing is necessary.

- **Laboratory Confirmations:**

Specimens which have tested positive can be transported directly to our laboratory for GC/MS confirmation by simply calling our courier service.

- **In-Service Training:**

On-site set-up, collection and training procedures are provided by HNL personnel at no additional cost.
