## CMS National Coverage Policy

Title XVIII of the Social Security Act, Section 1862(a)(1)(A) states that no Medicare payment shall be made for items or services which are not reasonable and necessary for the diagnosis or treatment of illness or injury.

Title XVIII of the Social Security Act, Section 1862(a)(7). This section excludes routine physical examinations.

Title XVIII of the Social Security Act, Section 1833(e) states that no payment shall be made to any provider for any claim that lacks the necessary information to process the claim.

## Coverage Guidance

### Coverage Indications, Limitations, and/or Medical Necessity

*Compliance with the provisions in this policy may be monitored and addressed through post payment data analysis and subsequent medical review audits.*

Vitamin D is called a "vitamin" because of its exogenous source, predominately from oily fish in the form of vitamin D2 and vitamin D3. It is more accurate to consider fat-soluble Vitamin D as a steroid hormone, synthesized by the skin and metabolized by the kidney to an active hormone, calcitriol. Clinical disorders related to vitamin D may arise because of altered availability of the parent vitamin D, altered conversion of vitamin D to its predominant metabolites, altered organ responsiveness to dihydroxylated metabolites and disturbances in the interactions of the vitamin D metabolites with PTH and calcitonin. This LCD identifies the indications and limitations of Medicare coverage and reimbursement for these services.

#### Indications:

Measurement of vitamin D levels is indicated for patients with:

- chronic kidney disease stage III or greater
- cirrhosis
- fibromyalgia
- granuloma forming diseases
- hypocalcemia
- hypercalcemia
- hypovitaminosis D
- hypervitaminosis D
- long term use of anticonvulsants or glucocorticoids and other medications known to lower vitamin D levels
- malabsorption states
- obstructive jaundice
- osteomalacia
- osteoporosis
- osteogenesis imperfecta
- osteosclerosis
- psoriasis
- rickets
- vitamin D deficiency on replacement therapy; to monitor the efficacy of treatment

#### Limitations:

For Medicare, testing may not be used for routine screening.

All assays of vitamin D and its metabolites need not be performed for each of the above conditions. Often, one type is more appropriate for a certain disease state than another. The most common type of vitamin D deficiency is that of 25 OH vitamin D. A much smaller percentage of 1, 25 dihydroxy vitamin D deficiency exists; mostly in those with renal disease. It is expected that the medical record will justify the tests chosen for a particular disease entity, that all available components of 25 OH vitamin D and other metabolite levels will not be performed routinely on every patient and that supportive documentation for test choices will be available to the Contractor upon request.

This Contractor does not expect to receive billing for the various component sources of 25 OH vitamin D separately (such as stored D or diet derived D). Only one 25 OH vitamin D assay will be considered for reimbursement on any particular day, if medically necessary, for the patient's condition.

Once a beneficiary has been shown to be vitamin D deficient, further testing may be medically necessary only to ensure adequate replacement has been accomplished for this vitamin deficiency, although, generally, other parameters are measured.

## Coding Information

### Bill Type Codes

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

11x	Hospital Inpatient (Including Medicare Part A)
12x	Hospital Inpatient (Medicare Part B only)
13x	Hospital Outpatient
14x	Hospital - Laboratory Services Provided to Non-patients
18x	Hospital - Swing Beds
21x	Skilled Nursing - Inpatient (Including Medicare Part A)
22x	Skilled Nursing - Inpatient (Medicare Part B only)
23x	Skilled Nursing - Outpatient
72x	Clinic - Hospital Based or Independent Renal Dialysis Center
83x	Ambulatory Surgery Center
85x	Critical Access Hospital

### Revenue Codes

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory; unless specified in the policy services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

### ICD-9 Codes that DO NOT Support Medical Necessity

All those not listed under the "ICD-9 Codes that Support Medical Necessity" section of this policy.

## General Information

### Associated Information

#### Documentation Requirements

1. All documentation must be maintained in the patient's medical record and available to the contractor upon request.
2. Every page of the record must be legible and include appropriate patient identification information (e.g., complete name, dates of service(s)). The record must include the physician or non-physician practitioner responsible for and providing the care of the patient.
3. The submitted medical record should support the use of the selected ICD-9-CM code(s). The submitted CPT/HCPCS code should describe the service performed.

### Utilization Guidelines

In accordance with CMS Ruling 95-1 (V), utilization of these services should be consistent with locally acceptable standards of practice.

Only one 25 OH vitamin D level will be reimbursed in any 24 hour period. Storage and supplement components will not be reimbursed separately.

Only one 1,25-OH vitamin D level will be reimbursed in a 24 hour period if medically necessary.

Assays of vitamin D levels for conditions other than ICD 9-CM codes 268.0-268.9 will be limited to once a year.

Assays of the appropriate vitamin D levels for ICD-9 CM codes 268.0-268.9 will be limited to 4 per year, for the previously identified deficient form of vitamin D.
